-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1616

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 5, 6, 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Hossainy.

Hossainy et al teach coated stents (title). Reducing the incidence of restenosis is disclosed (column 1 lines 16-20). Polycaprolactone is specified (column 4 lines 22-24). Vascular stents are disclosed (column 14 lines 11-13). Delivery of therapeutic agents in the coating is specified (column 7 lines 56 et seq.).

Claim 1 is directed to a medical device consisting essentially of a site-specific delivery device and at least one biocompatible polymer. "for the controlled release of at least one peroxisome proliferators-activated gamma agonist" is an intended use. That is, applicants do not claim the active agent, but rather, a device for delivering the agent.

Claims 1, 2, 5-7, 9, 11, 23, 24, 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 "A medical device consisting essentially of a site-specific device ... and at least one biocompatible polymer" is vague. The language states that applicants

Art Unit: 1616

claim the polymer in addition to the site-specific device. Similarly, in claim 11 applicants claims a stent, an active agent, and a polymer separately. It appears that "a medical device" should be deleted in both claims 1 and 11 and "consisting essentially of" should be placed after "site-specific device" in claim 1 and "stent" in claim 11. (The dependent claims should be amended accordingly.) Claims 23 and 24 depend on a cancelled claim.

Assuming that applicants intend to claim the active agent in claim 1, the following rejection is made:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Straub et al.

Straub et al teach porous microparticles containing an active agent (abstract). Rosiglitazone is disclosed (column 7 line 66). PEG is specified (column 9 line 50).

No claims allowed.

The action is non-final in view of the new art rejection over Straub et al.
